WALKERS WAY

Expansive living designed for space and privacy

Designed as a ranch-style home with a split layout, Walkers Way offers a thoughtful balance of openness and privacy across a single level. The central living area connects the kitchen, dining, and living spaces, creating a natural gathering point while still allowing each space to feel defined and functional.

The primary suite is positioned on one side of the home, offering a private retreat complete with a walk-in closet and a spacious bath featuring a separate tub and shower, double vanity, linen storage, and a private water closet. On the opposite side, two secondary bedrooms mirror one another and share a hall bath, creating a comfortable setup for family or guests. A utility room just off the kitchen includes a pantry and side entry, with room for additional features such as a freezer or utility sink, adding everyday convenience to a layout that simply works.
